Pain Points: 8

Feedback Topics

1. MLFlow Execution Errors – [4 posts]

Students are encountering various errors when trying to run MLFlow due to entry point issues and script errors.

"I keep getting this error with the provided code."

[Reddit post](#)

"when I try to run the MLFlow, it says it cannot find the entry point no matter what I do."

[Reddit post](#)

"Could not find main among entry points or interpret main as a runnable script."

[Reddit post](#)

"Whenever I try, I get a conda error even though I'm referencing the pipeline yaml file."

[Reddit post](#)

2. Confusion Over Submission Requirements – [1 posts]

Students are unclear about the submission requirements for tasks, particularly regarding GET requests.

"Is it required to submit a screenshot of the GET request return of the average departure delay?"

[Reddit post](#)

3. Issues with Script Files and Implementation – [2 posts]

Students are struggling with missing script files and the correct implementation of code for tasks.

"I can't find the python scripts for import and clean and poly."

[Reddit post](#)

"I was just using subprocess.run, but I understand that may be incorrect."

[Reddit post](#)

4. Environment-Specific Errors – [1 posts]

Students are facing errors in the GitLab IDE that do not occur in Jupyter Notebook, indicating environment-specific issues.

"when i run my python code in the gitlab ide i get this error: However when i run the code in my jupyter notebook it runs fine."
