Pain Points: 7

Feedback Topics

1. MLFlow Pipeline Issues – [3 posts]

Errors encountered when trying to run MLFlow pipelines due to script-related problems.

"It seems to be an issue with the multiple start runs that are in their script."

[Reddit post](#)

"Whenever I try, I get a conda error even though I'm referencing the pipeline yaml file."

[Reddit post](#)

"Whatever I'm doing right now feels very wrong as I'm getting some kind of run_uuid error."

[Reddit post](#)

2. MLFlow Entry Point Errors (*Emerging*) – [1 posts]

Challenges related to locating entry points when attempting to run MLFlow.

"it says it cannot find the entry point no matter what I do."

[Reddit post](#)

3. Submission Requirements Confusion (*Emerging*) – [1 posts]

Uncertainty regarding the specific submission requirements for tasks in the course.

"Is it required to submit a screenshot of the GET request return of the average departure delay, since I don't see one?"

[Reddit post](#)

4. Environment-Dependent Error Issues (*Emerging*) – [1 posts]

Errors arising in specific environments, such as GitLab IDE, that do not occur in others like Jupyter notebook.

"when i run my python code in the gitlab ide i get this error: However when i run the code in my jupyter notebook it runs fine."

[Reddit post](#)

5. Pipeline Running Guidance Issues (*Emerging*) – [1 posts]

Lack of clear instructions on how to run the pipeline, including file organization and execution processes.

"I need to know what runs the pipeline?"
