D387: Advanced Java

College: School of Technology
Topics: 4
Pain Points: 4

Feedback Topics

1. Compiling Errors and Troubleshooting *(Emerging)* – [1 posts]

Students are facing difficulties with compiling errors that are not replicable, leading to frustration over their submissions.

> "I just don't know what else to do... It's so frustrating having to troubleshoot a problem with a partial screenshot and no way to communicate with the evaluator for an error I cannot replicate."

---

2. Confusion with JDK Version Requirements *(Emerging)* – [1 posts]

Students are misinformed about the Java Development Kit (JDK) version requirements, causing confusion and unnecessary troubleshooting.

> "The project has to be run in JDK17 because of a Lombok compatibility issue... my course instructor insisted there was something I could change to fix it, but couldn't tell me what that was."

---

3. Installation Issues with Angular and npm *(Emerging)* – [1 posts]

Students are struggling with installation issues related to Angular and npm, which leads to confusion and frustration.

> "I met with a CI and they were lost as well."
